Lab Technician (m/f/d) for Molecular and Cell Biology Research

Location: Max Planck Institute for Biological Intelligence, Martinsried

Start date: As soon as possible or at the earliest possible date

Contract duration: 2 years (project-based)

Working hours: Part-time (50-75%, depending on agreement)

The Neurogenomics Lab of Dr. Christian Mayer at the Max Planck Institute for Biological Intelligence (Campus Martinsried) is seeking a dedicated **Lab Technician (m/f/d)** to support our research on the genetic and epigenomic regulation of GABAergic neurons in the context of autism spectrum disorders. This position is part of a recently approved research project.

Responsibilities

- Organizing and managing laboratory stocks (reagents, consumables)
- Genotyping
- Western blot
- 2D and 3D cell culture (preparing and changing media)
- Assisting PhD students and postdocs with experiments
- Mini- and Maxi-preparations
- Documenting lab materials in an online database
- Additional tasks related to the research project

Requirements

- Completed training as a laboratory technician, biological technician, or equivalent qualification
- Experience with molecular biology and cell culture techniques
- Organized, precise, and reliable working style
- Ability to work in a team and support scientific experiments

Application

Interested candidates should send a **motivation letter (max. 1 page)** and a **CV as a single PDF** via email to: christian.mayer@bi.mpg.de
